Reprint Definitions

(from the ASV Catalogue Glossary)

Type 1 Reprints	Stamps that are reprinted as stocks get low or to replace stamps that have been withdrawn due to a printing error. In Australia from 1988 they are usually <u>indicated by koala or kangaroo reprint symbols on the selvedge</u> . (1 koala = 1 st reprint, 2 koalas = 2 nd reprint, 1 kangaroo = 5 th reprint, 1 kangaroo & 2 koalas = 7 th reprint, etc. 2 kangaroos normally indicate the 10 th reprint, but sometimes they indicate the 9 th reprint where there was no space for 1 kangaroo and 4 koalas. Occasionally the number of koalas or kangaroos does not match the reprint number and sometimes they are omitted.) Occasionally these reprints have differences from the original, particularly perforations and image variations.
Type 2 Reprints	Stamps that are <u>released in a different format well after the original issue</u> and are not related to it. The format includes Souvenir Stamp Sheets (SSS), Special Event Sheets (SES), Special Occasion Prestige Booklets, folders, minisheets, sheetlets, etc. The stamps are usually “generic base stock” stamps but occasionally they are previously released stamps related to the subject of the sheet. In many formats the stamps have a tab attached with an image related to the subject of the booklet or sheet. The tab may also contain a customer’s photo or image (i.e. a P-stamp). The stamps are usually identical to the original stamp and therefore not listed in this catalogue unless they have a variation, such as perforation, image, layout, etc.
Type 3 Reprints	Stamps that have an <u>additional year code in the image</u> corresponding to the reprint year to distinguish them from the original stamp. This occurred in Australia from 26 th June 2007 however not all reprints released after this date have this year code

- Note:
1. All stamps are mint unless otherwise noted.
 2. The selvedge may be on the opposite side from that shown. If you want a special location, such as the top corner, please ask – I may have it.
